

Agricultural Engineering Associates, Inc. is a small broad based ag/civil engineering firm located in Southeast Kansas licensed to do work in over 20 states. We are seeking full and part time engineering/CAD technicians to join our team. Candidates must be self-starting and detail oriented individuals who can manage multiple projects and provide CAD and other technical assistance to our engineering staff.

Qualifications for this position:

Knowledge of or willingness to gain experience in the following:

- AutoCAD Civil 3D.
- Basic construction monitoring procedures such as concrete testing, compaction testing, permeability testing, soil boring and other various testing procedures.
- Familiarity with GPS and Total Station surveying equipment.
- Knowledge of or understanding on where to find OSHA, MSHA, DOT, and EPA regulations
- Knowledge of the 2012 International Building Codes

Job activities could include:

- Drafting of projects and surveys using AutoCAD Civil 3D
- Travel to various job sites to conduct testing and inspection of construction materials, such as concrete testing, soil compaction testing, and visual inspections, as well as operation of boring equipment for test holes and soil identification.
- Assist company in developing MSHA and OSHA safety programs for compliance on contractor job sites
- Work with surveyors in conducting surveys, job site stakeouts for cut/fill and building layout
- Perform testing on materials such as concrete strength, soil Proctor density standards, soil permeability testing, and soils plasticity index.
- Assist company with safety training as needed
- Conduct Dam Safety Inspections
