

Automotive Technician Monday - Friday with weekends off. We provide training when available and will pay for ASE testing/certification.

Looking for someone who is motivated and able to work with minimal supervision. Must have your own tools and a valid drivers license.

Deans Auto Repair has been here since 1979, Perry has worked here since 1988 and we purchased from original owner in 2012. We are a general automotive repair shop.

We work on a wide variety of vehicles. We do bumper to bumper maintenance and repair on anything from mowers and generators to large farm trucks and tractors. We have current and up to date computer diagnostic equipment with the ability to do some computer programming.
