

We are seeking a Machine Operator to join our team! You will help produce high-precision components and ensure excellent quality control. There is schedule flexibility, less red tape, a sense of ownership, and far fewer bosses to answer to!

**Responsibilities:**

- Operate a variety of CNC equipment to produce high-precision components
- Troubleshoot and resolve issues in a timely fashion
- Load and unload parts and materials
- Responsible for meeting standard production timelines
- Conduct routine preventive maintenance on machine
- Log time against customer orders using inhouse manufacturing system
- Check part specifications agree with requirements on part order

**Qualifications:**

- Previous experience preferred, will train
- Familiarity with plant tools and equipment
- Strong troubleshooting and critical thinking skills
- Ability to handle physical workload
- Ability to thrive in a fast-paced environment

For more information call 785-738-3125 or apply within at 3161 US Hwy 24 Beloit KS and ask for John!
