

We are seeking a Laser Operator to join our team! You will have opportunity to advance right away, schedule flexibility, less red tape, a sense of ownership, and far fewer bosses to answer to!

**Responsibilities/Duties:**

- Use tape measure, calipers, and gauge thickness wheel to verify type and size of material
- Use hands, crane, or forklift to retrieve and load material on machine
- Operate specialty programs like SolidWorks. Training is available.
- Read and understand drawings and ensure machine is cutting within specs
- Unload machine, sort, count, organize and package cut parts
- Clean, Sweep, wipe, grease machine to keep in good running order

**Qualifications:**

- Previous experience preferred, will train
- Familiarity with plant tools and equipment
- Strong troubleshooting and critical thinking skills
- Ability to handle physical workload
- Ability to thrive in a fast-paced environment
- Background in the industrial metal industry preferred.
